UNCHAIN THE POWER

Replacing your tire chains to Olofsfors ECO-WHEEL TRACKS means that you can say goodbye to all those unnecessary hours taken up by maintaining the chains. Olofsfors is the largest manufacturer of tracks for rubber tired forest equipment. Our tracks can last longer and are an economical alternative to conventional chains. When it comes to total operating costs, remember that Olofsfors ECO-WHEEL TRACKS have tire protecting properties which means that our tracks can fit on new or worn tires. In short – keep your skidders, harvesters and forwarders on track by lowering your operating costs. Chains? No comparison.

Easier to install

ECO-WHEEL TRACKS increase machine stability and reduce drive-line shock caused by spin and grab. Out in the woods, wheel tracks are easier to install and gives great possibilities for quicker adjustments.

Longer operating season

Most importantly is that our products have their origin in the tough Nordic conditions. Our ECO-WHEEL TRACKS and EVO extend the operating season, as they can cope with much tougher terrain conditions. This means that your machine can give you more in return.

- › Lower ground pressure
- › Less ground disturbance
- › Improved flotation from standard tires
- › Self-cleaning, smooth ride
- › Increased stability and mobility
- › Less maintenance

Think upwards, forward and onwards
and choose the right tracks

ECO-WHEEL TRACKS™

► Olofsfors ECO-WHEEL TRACKS are manufactured for skidders, wheeled feller bunchers, harvesters and forwarders. ECO-WHEEL TRACKS provide superior traction with reduced spin and grab, less maintenance and less ground disturbance. A very economical alternative to conventional tire chains. Supplied in three different link system sizes to match your machine, application and ground conditions.

For the "CTL" machines there is a ECO-WHEEL TRACKS with lighter cross members designed to fit lighter machines such as harvesters and forwarders. Provides superior traction, improved machine stability and increases flotation.

EVO-WHEEL TRACKS™

► The track that has well-rounded properties and is kinder to the terrain. EVO has excellent traction and tyre protection as well as a cross member design that provides very good cleaning properties.

ECO-WHEEL TRACKS™ WITH SIDE SUPPORTS

► A complete series of ECO-WHEEL TRACKS that, thanks to straighter cross members and a wider contact area, really takes you where you want. ECO-WHEEL TRACKS takes you upward, forward and over and even a little further. ECO-WHEEL TRACKS gives you superior traction, improves machine stability and increases flotation. Stay one step ahead by using ECO-WHEEL TRACKS. ECO-WHEEL TRACKS with side supports are available with a number of different cross members and models that can be customized to your specific requirements and conditions.

EcoTracks Country

**For those who go where no one else goes.
Always goes up-over-forward. Our operators
are the world's best inspiration for better track
technology. Welcome to our territory.
